

Sovereign Multi-Agent AI

Sovereign AI by IsaKai Holdings and Bookings Group LLC

A \$60,000 Vision for a First-to-Market AI Ecosystem

System Overview

IsaKaiHBG_AI merges three core AI models into a sovereign ecosystem: • Gemma 7B – Research and rapid summarization • WizardCoder 7B – Automated coding and script generation • Mistral 7B – Real-time trading strategies and analytics This combination enables fast development, market analytics, and trading — all while maintaining full data privacy and sovereignty.

Technology & Sovereignty

- Whisper + LLaMA.cpp +
Ollama for offline AI
reasoning - WireGuard &
Yggdrasil for decentralized
secure networking - Firejail
optional sandboxing for
hardened runtime

- Intel i9-14900K, 192GB
DDR5 RAM, RTX 4090 - 2TB
Samsung 980 Pro NVMe
SSD RAID - Baseline \$20K
stack, scalable to \$60K
enterprise build

Funding Request: \$60,000

The \$60K round scales IsaKaiHBG_AI from our \$20K prototype stack to an enterprise-ready, sovereign AI system capable of handling 24/7 trading, automated coding, and live research support for global clients. ROI projections: 3–5x return in Year One via trading profits, SaaS licensing, and consulting packages.

Join the Future of Sovereign

IsaKaiHBG_AI isn't just another AI platform — it's the future of ownership and independence. We're empowering individuals and companies to harness AI without Big Tech dependency. This \$60,000 investment will fuel not just infrastructure, but a movement: a profitable, private, and sovereign AI ecosystem designed to thrive for years. Invest today and become a partner in reshaping the AI landscape — not just to profit, but to lead a revolution in how AI serves humanity.
